

Free English School Program Save the poor Cambodia Children

Dear Sir & Madame

These are the pictures of the classroom of English language in TRAPANG PO primary school, east north of SIEMREAP city, Cambodia. So far, their English studying is going so well. They have finished learning the English alphabet and have gone through some English writing and reading. To get a much more better result, I had tried to search for a better document that it will help to improve their knowledge faster. I have decided the new reading book called <New Headway>. This book is more general than the last one. The lesson is full of examples and instruction to help the student to improve the speaking, reading and writing better. I have prepared the examination for them for every single lesson to find out how much they get improve. The result always comes better and better. Often, I bring my clients to the school. The reason is to let the class to have a chance to practice their English speaking.

Finally, I would like to wish all donors to be healthy and more prosperous.

They learn reading & writing English

They learn speaking English in Group

Thanks for all your help.
